GORT METALS AWARDED THREE CONTRACTS BY BALFOUR BEATTY CONSTRUCTION

Gort Metals Corporation is proud to announce it has been awarded 3 contracts by Balfour Beatty Construction to fabricate and install parking canopy systems for the new NTT Global Data Centers campus in Mesa, Arizona.

The contracts correspond to the project's 3 planned construction phases, positioning Gort Metals as a key project partner throughout the campus development. Under the awarded contracts, Gort Metals will provide parking canopy systems for each phase of the project, including engineering, fabrication, delivery, foundations, erection, painting, and final installation.

Phases 1-3 will each include the installation of 7 full cantilever parking canopies, 3 of which will feature enhanced architectural fascia, box gutters, gutter hangers, and integrated downspouts adjacent to the building, bringing the total project scope to 21 custom-engineered parking canopies across the three-phase development.

With more than 4 decades of experience, Gort Metals has earned a reputation for delivering high-quality custom steel structures throughout the Southwest. From commercial parking canopies and solar support structures to architectural steel solutions, the company provides turnkey fabrication and installation services for projects requiring durability, precision, and dependable execution.

As construction progresses through each phase of the NTT campus, Gort Metals looks forward to continuing its partnership with Balfour Beatty Construction and contributing to one of Arizona's significant technology infrastructure developments.

MORE ABOUT GORT METALS

Founded in 1983, Gort Metals Corporation is an Arizona-based designer, manufacturer, and installer of custom steel structures serving commercial, industrial, municipal, and utility markets throughout the Southwest. Specializing in parking canopies, solar support structures, and custom fabricated metal solutions, Gort Metals delivers turnkey projects with a commitment to craftsmanship, safety, and long-term value.

“

THIS AWARD REFLECTS THE CONFIDENCE THAT LEADING CONTRACTORS CONTINUE TO PLACE IN OUR TEAM. BEING SELECTED TO SUPPORT THIS LANDMARK PROJECT IS A TESTAMENT TO THE QUALITY OF OUR WORK, OUR EXPERIENCED TEAM, AND OUR COMMITMENT TO DELIVERING COMPLEX STEEL STRUCTURES SAFELY, ON SCHEDULE, AND TO THE HIGHEST STANDARDS.

-John Gort, President of Gort Metals
